- Connect blue cord to “N” or black terminal

If the terminals of the plug are unmarked or if you are in any doubt, consult a qualified electrician.

If the plug is not supplied, fit a plug according to the load shown on the rating plate.

If connection is directly made to the main power switch, an omnipolar switch with the minimum opening distance of 3 mm must be installed to it. Cords must be installed according to the relative regulations.

Note: Should the lamps not work, check whether they are fixed tightly.

- 1 Spacer
- 4 Screws
- 2 Bulbs

- When installed, the hood must be at least 65 cm above the cooktop.
- This hood is designed for fitting in a cabinet or on other support. Using the 4 screws supplied to secure the hood.
- Adjust the spacer to closely attach the hood to the wall.
- Before completing any connection, make sure the house voltage corresponds with the voltage indicated on the data label.

安裝說明 INSTALLATION INSTRUCTIONS

• 抽吸方式

以排氣喉接駁排氣口（直徑125 mm）。

抽油煙機不可接駁至其他排氣管道或熱空氣循環的管道內，亦不可接駁用作排放以其他能源操作的器具所產生的煙氣。

當抽油煙機用作抽吸模式時，需注意可能影響於附近利用空氣助燃的器具之操作。因此為確保正常操作，室內必須保持空氣流通。

不可將非電力操作的燃氣器具的排氣管道，用於向外抽吸模式的操作。

• 過濾方式

如沒有排氣喉排出室外，可使用活性炭過濾網。空氣會經過濾網過濾然後循環。

過濾網不可清洗及必須最少每六個月更換一次。污物在過濾網的沉澱程度視乎使用時間長短、烹調方式及清洗隔油過濾金屬網次數而定。

活性炭過濾網須安裝於機身抽氣機組中間位置，鎖緊時會聽到聲響。

安裝時須拆下金屬濾網。

以接駁圈連接接駁喉。空氣會經吊櫃內的接駁喉排放。

以過濾方式操作，活性炭過濾網安裝如下：

1. 打開金屬濾網。
2. 將活性炭過濾網對準摩打旋緊以固定位置。
3. 裝回金屬濾網。

• SUCTION HOOD

Connect the air outlet to the exhaust pipe (with a diameter of 125 mm).

The hood must not be connected to fuel exhaust or to a duct in which hot air is circulated or to a duct utilized for exhausting fumes from appliances powered by an energy other than electricity.

When using the hood in suction version, beware of the nearby burners that take air for combustion. To ensure normal functioning, it is necessary to keep good ventilation of the room.

Exhaust must not be carried out in a flue utilized for the combustible gas of appliances not powered by electricity.

• FILTERING HOOD

When there is no exhaust pipe for venting fumes to the outdoors, you can use carbon filters. The air is then depurated by the filters and discharged back into the surroundings.

The filter is not washable; it cannot be regenerated and have to be replaced at least once every 6 months. Saturation of the carbon filters depends on prolonged use of the hood, on cooking habits and on frequency of grease filter cleaning.

Carbon filters should be installed in the middle position of the air-extracting apparatus. A sound will be heard when the filters are correctly positioned and locked.

Remove the metal grid during installation.

The air is released in the room through a connecting pipe, which goes through the hanging cupboard. The connecting pipe should be connected to the connecting ring supplied.

To use the appliance as a filtering hood, install carbon filters as follows:

1. Open the metal grid.
2. Secure the carbon filters to the motors through the knob.
3. Reinstall the metal grid.

清潔與維護 CARE & MAINTENANCE

保養

定期保養可確保抽油煙機有效運作，特別是金屬濾網及活性碳過濾網。

金屬濾網會絆着空氣中的油脂微粒，視乎使用及烹調方式經過一段時間會堵塞金屬過濾網，必須最少每隔兩個月清洗一次，方法如下：

1. 拆下金屬過濾網，以中性清潔劑混和暖水清洗，使污跡軟化。

2. 以溫水沖洗。

* 如不遵照以上程序清洗會有引起火警的危險。

活性碳過濾網在過濾方式中會隔取氣味及淨化空氣。經長時間使用及視乎烹調模式及次數，污物會在過濾網積聚。

最少須每6個月更換活性碳過濾網。以濕布沾火酒或溫和清潔劑經常清理摩打外殼及其他表面。

更換燈泡

1. 切斷電源。

2. 除下燈罩。

3. 以相同類型的燈泡更換壞掉的燈泡，再套上燈罩。

MAINTENANCE

Regular maintenance should be carried out to ensure effective functioning of the hood, particularly in the case of the grid and carbon filters.

The grid has the function of catching the fat particles suspended in the air. It is thus subject to clogging at various intervals, depending on usage and cooking habits. In any case, it is necessary to clean the grid at least once every two months according to the following steps:

1. Remove the grid and wash it with a solution of lukewarm water and mild detergent, allowing the dirt to soften.

2. Rinse thoroughly with lukewarm water.

* There is a risk of fire if the hood is not cleaned in accordance with the above instructions.

During operation, the carbon filters are capable of trapping odors and purifying the air. Depending on cooking habits and frequency, carbon filters must be replaced after prolonged use.

It is necessary to replace the filters at least once every six months. Clean frequently all the deposits on the motor case and the other surfaces by using a cloth moistened by methylated spirits or mild detergent.

CHANGING THE BULBS

1. Disconnect the hood from the electricity.

2. Remove the lamp cover.

3. Always replace burnt-out lamps with the same and then reposition the lamp cover.
